Under the Guidance of
Prof. Prabhu M
Dept. of Computer Science.

What is this Volunteer Management System ?

A real/non-real time System that provides a digital/virtual way of managing volunteers in a voluntary organization with respect to all kind of events that they conduct.

What is the problem that lead to this initiative ?

A Voluntary organization will always have a handful of volunteers but to manage and retain the volunteer strength becomes an issue.

Voluntaria is the one stop solution for managing the volunteers for any events irrespective of its scale..

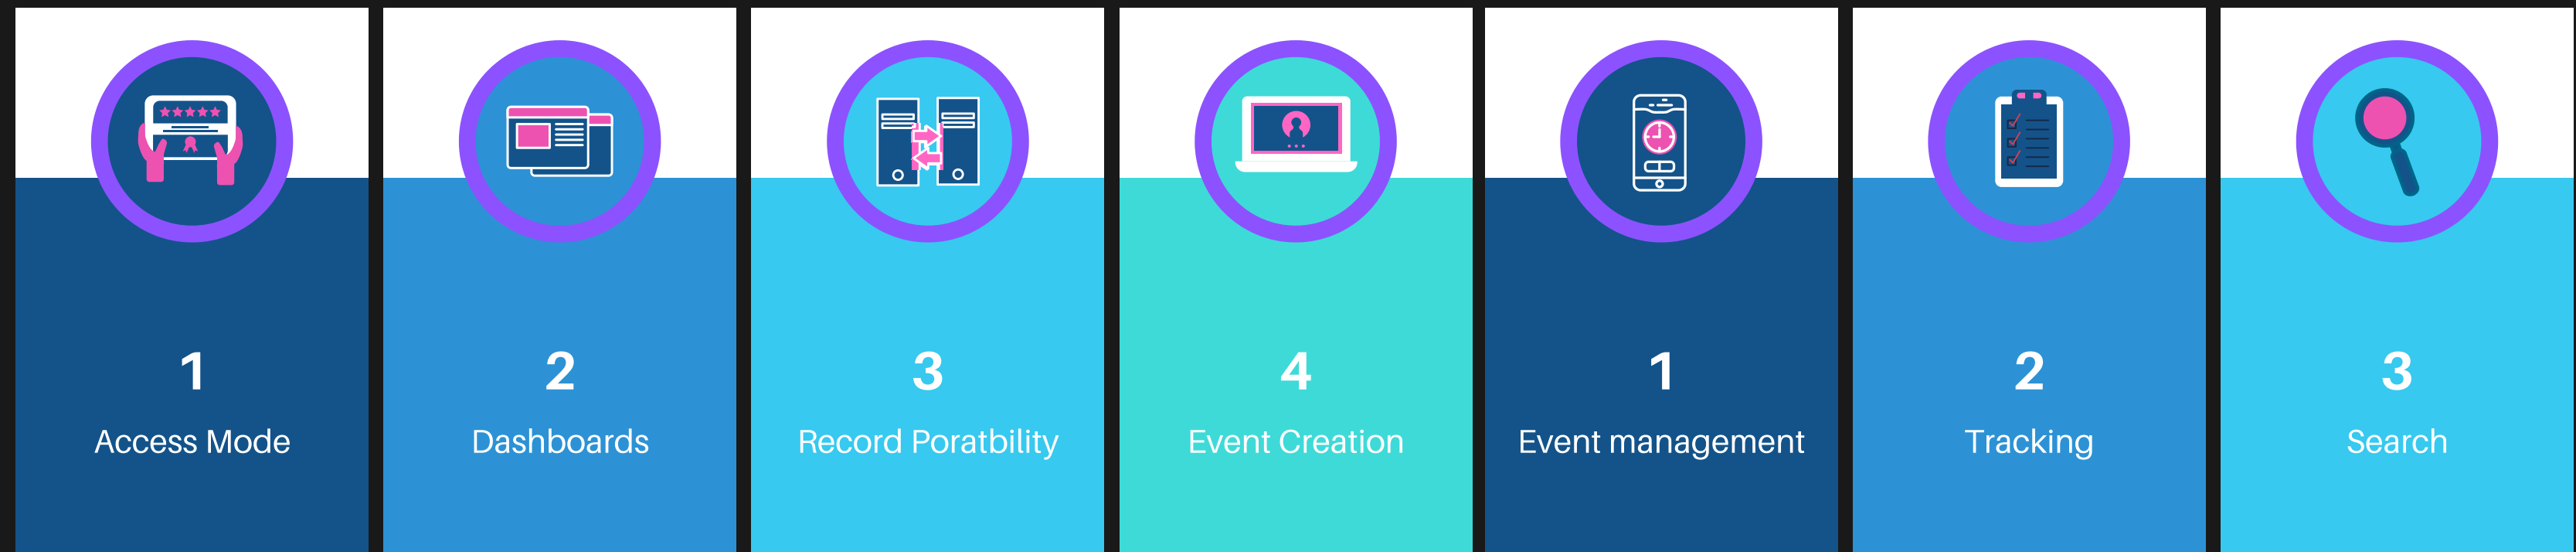

PURPOSE

Organizations like NGOs are an important part of our country's development. Involvement of people and their contribution towards these areas can benefit our country in more ways than one and this should be encouraged as much as possible.

SCOPE

The prime and direct area of application is for Non-Profit Organizations such as NGOs, universities and schools. We primarily focus on NGOs as they are an important part of our society's welfare. This application will be very useful and can be easily adopted in these non-profit organizations.

APPLICABILITY

SYSTEM REQUIREMENTS

Functional Requirements

Volunteers should be able to register in any event, choose their roles, complete their tasks and view their performance.

U S E R

Characteristics

Admin can add/create & manage events, control different level of access and rate volunteers according to their performance.

1

Cascading Style
Sheet

2

Java-Script

3

XAMPP Web
Server

Tools used/required

HARDWARE

Tools used/required

1. HARD DRIVE

20 GB and more is recommended (Non-system drive is preferred).

2. PROCESSOR

Minimal: 1.6 GHz CPU
Recommended: 2.0 GHz CPU

3. RAM

Minimal: 1.75 GB RAM
Recommended: 2 GB RAM

4. DISPLAY UNIT

EGA/VGA Color Monitor
with a resolution of minimum 1024 X 768 and higher.

5. NETWORK

Internet Connection Broadband (high-speed)
Internet connection with a speed of 4 Mbps or high

1 REGISTRATION

The Volunteers can register to Voluntaria with their own set of preferences along with their required official details. The Voluntary Organization can register initially with one Admin and its Official details

2 EVENT CREATION

The admin of the Voluntary Organization can create events with necessary volunteer specifications along with all the official details required for information on conducting the event.

3 COMMITTEE CREATION

The creation of all necessary committees is done during the creation of event. The Admin needs to specify the required no of Volunteers of each committee.

4 JOIN EVENTS

The Volunteers in Voluntaria are allowed to search for the events which matches to their preference and join that event in a specific committee. The event gets added up to their profile

5 TRACKING

The event head delegates work to each committee either specific to Volunteer or common to all the volunteers present in the committee. The Event Head can track and monitor the work being done. Similarly, the volunteer can update and keep a track of the work being done. The Admin is allowed access to this operation.

6 PERFORMANCE

On completion of the work of a committee, the event head can rate a volunteer on the basis of the work that they have done on or off the field or the work submitted. The rating builds the profile of the Volunteer. The Admin is allowed access to this operation.
